Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Response to Arguments

1. Applicant's arguments with respect to claims 53-58 and 61-63 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 53 and 61-63 are rejected under 35 U.S.C. 102(e) as being anticipated by Edwards et al. ("Edwards")(US 5,588,960).
4. In reference to Figures 1 and 2 Edwards discloses a catheter system comprising an elongate flexible body (22) which contains a tissue penetrating element (52), and a guidewire (41) disposed within the tissue-penetrating element wherein the guidewire has a first configuration disposed within the elongate body and a second configuration wherein the tissue-penetrating element and guidewire are curved through an opening (36) within the sidewall (26).
5. Edwards further discloses an imaging apparatus (126) wherein the imaging apparatus and the tissue penetrating element are each disposed in a lumen (Figure 1).

Claim Rejections - 35 USC § 103

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

*Cmmw
10/29/07* 7. Claims 54-58 are rejected under 35 U.S.C. 103(a) as being unpatentable over Edwards in view of Faxon et al. ("Faxon") (US 5,464,395).

8. Edwards discloses a catheter system as disclosed above however Edwards fails to disclose a balloon used to anchor the system within a vessel. Faxon discloses the use of a balloon to secure a catheter system within a blood vessel (Col. 7, lines 60-65). It would have been obvious to one of ordinary skill in the art at the time of the invention to combine the balloons of Faxon with the catheter system of Edwards, the rationale for combining the two references being that the use of a balloon to anchor a catheter system within a vessel is a well known technique within the art and it is also well known within the art that such a combination would produce a device with a reasonable expectation of success.
